

Intelligent Cloud Solutions

Guiding Customers on the Ultimate Azure Journey.

// The Microsoft Solution Assessment team is excited to partner with CCG to deliver customers a complimentary analysis of their data center environment to provide a complete inventory and high-level cost estimates across key cloud migration scenarios.”

—Frank Rossi, MSUS Solution Assessment Specialist, Microsoft

Knowing where to start in your journey to the cloud can be overwhelming. CCG can help you build a strategy, migrate, optimize, and even manage your cloud instance so you can get maximum ROI on cloud investments.

There is no denying that moving to the cloud has many benefits, but it's how and what you move to the cloud that is important. Often, businesses pay a premium for moving their data to the cloud or get talked into merely performing a “lift and shift.” We work with your company to develop a plan that considers the ultimate goals for your data and analytics or infrastructure while optimizing your environment.

DO YOU FACE THESE CHALLENGES?

- Did you run into more problems than expected during your last cloud initiative?
- Are you worried that moving to the cloud isn't enough? That your team will still face challenges with the data and resources in your environment?
- Do you worry that you're going to face a security issue, unplanned downtime, or performance issues?
- Does your team spend too much time managing systems and infrastructure instead of working on revenue-generating or strategic initiatives?

CERTIFIED CLOUD EXPERTS TO GUIDE YOU IN:

Cloud Strategy

Your cloud investment should not stop at infrastructure. CCG works with your team to develop a comprehensive strategic assessment and roadmap which evaluates people, processes, security, technology, and data. With 100% of our consultants certified Microsoft Azure experts and a track record of successful implementations, we give you the peace of mind that your planning efforts are done the right way the first time.

Cloud Optimization

Sometimes cloud implementations need help. If your cloud deployment is not quite what you expected from a cost, performance, security, or problem perspective- CCG is here to help. Don't let your cloud costs go sky-high. We work to understand your environment and prescribe cost-saving solutions to increase uptime, ensure smooth network and connectivity, and avoid security risks. As a Cloud Solution Provider (CSP), we make it easy to understand licensing agreements, renewals, and subscriptions. We can also change or recalibrate your environment to get it to the optimal footprint.

Cloud Migration

Our experts help you deploy or shift your solution the right way the first time. Our consultants are backed by in-depth data, analytics, and cloud infrastructure expertise, understanding the right way to deploy new or existing applications, infrastructure, and data platforms. We work with your team to deploy a comprehensive migration plan, provide DevOps services, and help you integrate with current IT assets.

Cloud Managed Services

CCG offers cloud management with 24 x 7-hour monitoring and support with up to guaranteed 99.99 uptime – 5X less downtime than other cloud providers. By working with CCG's cloud management team, your workforce can spend more time on strategic business initiatives and less time worrying about maintenance.

KEY BENEFITS OF PARTNERING WITH CCG

- 100% Azure Certified Experts
- Compliance certifications with SOX, SOC2, HIPAA, ITAR, and Safe Harbor/Privacy Shield
- Access to Data, Analytics, Strategy and Governance experts
- A secure and available environment with up to 99.99 uptime guaranteed
- Enterprise-class operational support system and help desk ticket systems
- 99.8% customer retention for cloud services
- 100% onshore employees

A strategic cloud assessment is a great place to start. This hands-on evaluation allows you to work with a cloud expert and some funding is available to you from Microsoft. To learn more, contact your account executive or visit www.ccganalytics.com.
