

Data Governance

Accurate, Secured, Organized Data and Processes for Faster Analysis and Rich Insights

// CCG has partnered with us in building a world class data governance program that will enable us to manage our data in a way that meets our corporate standards and the standards of our most important asset, our members.”

—Robert Klopman, VP of Business Insights
VyStar Credit Union

At CCG, we recognize that not everyone in your business will understand the challenges with harnessing accurate and organized data. We want to ensure you see your data as a strategic and compliant asset. By partnering with CCG for Data Governance initiatives, your entire organization will be empowered to get to insights more efficiently, invest in innovative technologies, and have your team spend their time on value-added (not-redundant) initiatives.

DO YOU FACE THESE CHALLENGES?

- Are you leveraging your data as a strategic, competitive, and operational asset?
- Do you have data access under control and in check?
- Does your current data environment lack the processes and policies to enable you to grow?
- Do you lack a leader with experience in leading data governance efforts?

// Our IT team didn't have the time or skillset to explain data governance, so we brought in CCG for outside help. For us, CCG's DG framework was simple, straight forward, and fast. It was an excellent program for what we needed.

- Serena Sacks, Former CIO of Fulton County Public Schools

KEY BENEFITS OF PARTNERING WITH CCG

- 100+ years combined Data Governance experience
- RapidDG offering which can enable you with governed data 9X faster than competitors
- Rich background in cloud infrastructure, analytics, and data processes
- Trusted framework meant for business and technical leaders alike

58%

of business leaders attribute an increase in revenue as a benefit of good data governance.

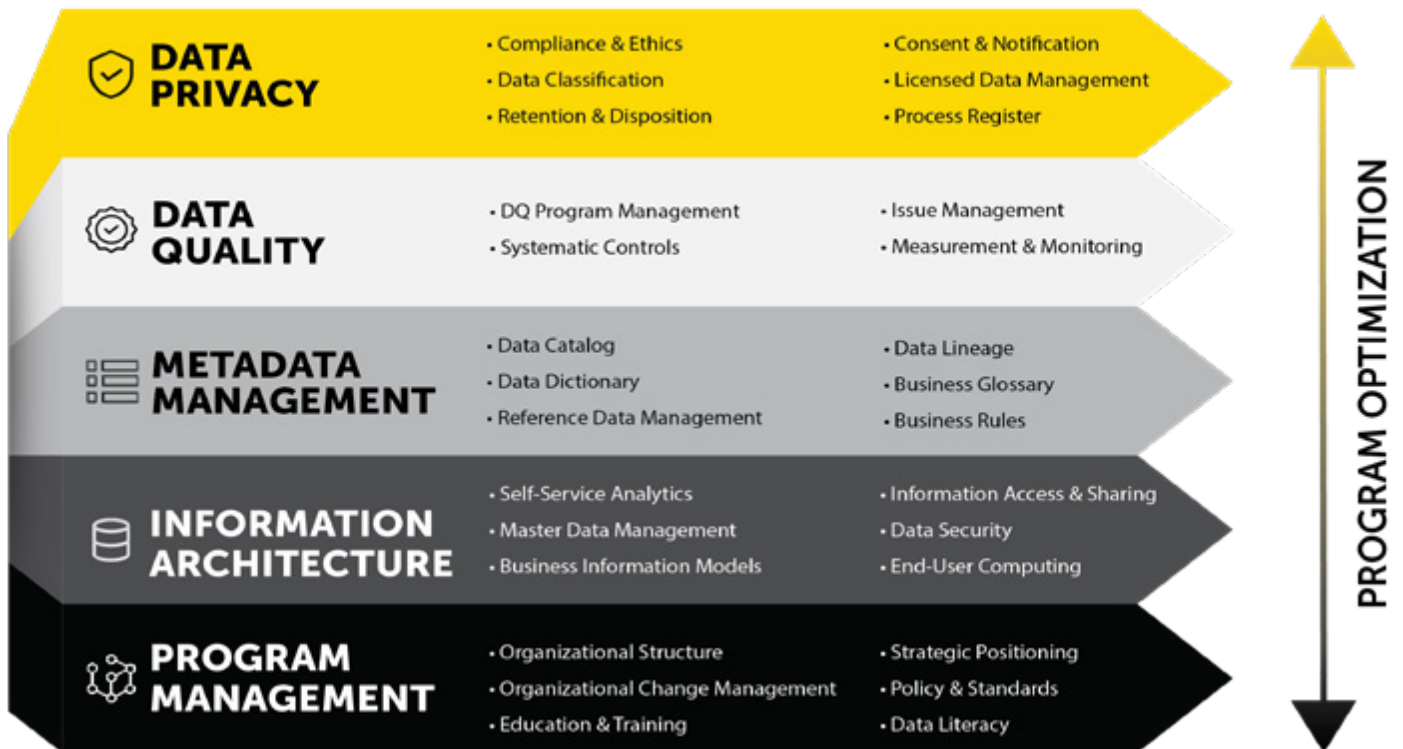

-(Harvard Business Review, 2020)

DATA GOVERNANCE FRAMEWORK

Look to CCG's comprehensive framework covering Data Privacy, Metadata Management, Information Architecture, Data Quality, and DG Program Management. At CCG, we check your compliance capabilities by assessing your regulatory readiness. We analyze the data literacy of your workforce and how they are enabled with documentation such as data lineage, glossaries, and dictionaries. Finally, our Data Governance framework evaluates your data quality management controls and standards.

Work with us to accelerate analysis across the organization, and harvest rich insights through adequate information access, sharing, and standardized information architecture.

CCG' multi-layered framework ensures every element of your data is considered, managed effectively, and customized to meet your business's needs.

Connect with an expert to join a [Data Governance Workshop](#) to learn about passive, reactive, and proactive approaches to DG and understand where your business resides.
