

POWER TO THE PEOPLE: POWER PLATFORM DEMOCRATIZES APP DEVELOPMENT, AUTOMATION & ANALYSIS

Microsoft’s Power Platform – PowerApps, Power Automate and Power BI – is transforming the digital landscape by enabling end users to perform previously costly and time-consuming technical functions without technical expertise. Now, businesses can create custom apps, automate manual workflows, and analyze data without having to face a lengthy wait behind a backlog of other IT projects and requests.

CCG is a Microsoft Gold Partner that can work with your team and it’s data to evolve the solutions to meet the needs of your business. We leverage a quick time deployment and production model to develop a tailor-made environment to support consistent self-service reporting and analytics throughout the organization.

POWER BI

01

Power BI is a business analytics tool which allows you to easily connect to multiple data sources, create visuals and gain business intelligence quickly. Overcome common challenges such as IT bottlenecks, a lack of access to data, and long wait times for mission critical insights. Power BI empowers end users with a short development cycle, versatile source system connectors, an intuitive drag and drop interface, multiple visualization options, and easy collaboration with workspaces.

74%

Cut development costs from leveraging Power BI.

POWER AUTOMATE

02

Power Automate (previously known as Microsoft Flow) allows you to create automated workflows between your Microsoft services or other third-party applications to save time, reduce human error and streamline processes. Leverage prebuilt connectors, common workflow templates, and set up triggers, alerts, emails and more to automate simple or repetitive tasks. No coding required.

271%

average ROI by leveraging PowerApps.

POWER APPS

03

PowerApps offers a low-code approach to custom app development, allowing non-technical users to quickly create apps with a user-friendly “point-and-click” approach. Now “citizen developers” can build apps right out of the box that perform budget tracking, help desk management, meeting capture and much more. PowerApps frees up your IT teams and allows you to easily integrate with data from your existing systems such as Dynamics 365, Office 365 and Synapse.

THE POWER PLATFORM IN ACTION

KEY USE CASES

Leverage CCG's Power Platform Consultants to:

- Build a strategic plan and roadmap to transition legacy reporting systems
- Address disparate data and consolidate enterprise reporting
- Successfully migrate reports from platforms like Tableau, MicroStrategy, and Spotfire to Power BI
- Ensure proper BI governance around data collection, storage, management, and integration
- Seamlessly analyze and visualize data from Power Apps and Power Automate
- Identify process bottlenecks and reduce time spent on repetitive operational or administrative work
- Model, shape, and visualize data from multiple sources
- Consult on best-practice data workflows using Power Automate
- Train developers, consumers, and executives based on their needs, use cases, and experience

PARTNERING WITH CCG TO DRIVE DIGITAL TRANSFORMATION

CCG is dedicated to empowering enterprises with innovative data management, industry-specific analytics solutions, and high-touch cloud services. Our data strategists specialize in every aspect of the data ecosystem, from platform modernization and cloud management to data science and artificial intelligence (AI).

CCG's experts have experience in a breadth of Microsoft tools and technologies and specialize in Microsoft Azure and Power BI implementations. We're proud to have earned the following Microsoft Certifications: Gold Data Analytics, Gold Cloud Platform, Gold Application Development and Silver Security.
